PROFESSIONAL SUMMARY

I am a programmer with a knack for problem solving, a healthy disregard for the impossible and a strong desire to build things and use Science and Technology for the betterment of humanity.

EXPERIENCE

Andela — Software Developer

June 2015 - PRESENT

- Built a 360 rating tool that was used internally for assessments and progression.
- Led an internal team to build a web game while learning about practices such as Pair Programming, Agile methodology, problem solving, e.t.c
- Mentored developers within the company to level up on different Software Engineering areas.

ShipStation | Andela, Austin, USA — Integrations Engineer

June 2019 - PRESENT

- Leading a small team working on various 3rd party carrier integration systems.

FlightOffice | Andela, Ottawa, Canada — Full-Stack Developer

June 2017 - August 2018

- Built a cross mobile app from the ground up to cater for mobile users of a SAAS tool for flight operations management.
- Helped build and add features to the web application,
- Improved the overall speed of the web application by up to 50%

Connect | Andela, San Francisco, USA — Backend Developer

May 2016 - Dec 2016

- Worked in a team to build the backend for a platform that helped organise small scale events between friends
- Built a CLI tool that helped collect and aggregate licenses for all open source tools used in the codebase.
